The National Commercial Bank at a Glance

The National Commercial Bank was established as a Libyan joint-stock company with a capital of 500 million Libyan dinars, in accordance with the provisions of Law No. 153 of 1970, issued on December 22, 1970. Since its inception, the bank has expanded to 65 branches, achieving a record growth in its assets, which reached over 19.71 billion Libyan dinars in 2020.

Through its vision, objectives, plans, strategies, and the dedicated efforts of its employees, the National Commercial Bank has established itself as a key player in the local, regional, and international banking markets, embodied in its motto: **“With the dawn of each new day, we bring you ongoing capabilities.”** By adhering to the bank’s core culture and principles, we have been able to implement significant and qualitative changes, earning the trust of our customers and investors as a premier choice for leading the local market in providing superior financial services and products with the highest returns.

Our Vision

The vision of the National Commercial Bank is centered on achieving the highest standards of service and quality, setting the benchmark by which the local and international banking sectors measure their performance.

Our Mission

- To create genuine value in the products we offer and the services we provide to our customers.
- To make a tangible difference in all our endeavors to lead the local market, by delivering high-quality services based on market and customer needs.
- To secure substantial and long-term returns, safeguarding the interests of our shareholders, relying on building a highly motivated and performing team, and fostering a stimulating and rewarding work environment.

Our Values

The work culture at the National Commercial Bank is distinguished by a set of values that form the foundation of our operations. Foremost among these is the cultivation of creative talent among all employees at every administrative and functional level. We are committed to implementing and developing the most efficient modern technologies to meet the needs of all stakeholders, while respecting our deeply rooted local values, customs, and traditions. We aim to establish mutual trust and accountability as the cornerstone of our relationships with all customers, striving to make the National Commercial Bank the primary destination for all clients. This is achieved through precise and swift performance, dedication to work, quality service, and a spirit of teamwork.

BUDGET EXPLANATIONS

Budget Explanations

Notes and Complementary Basis to the Financial Statements for the year ended 31 December 2022:

1. Establishment of The National Commercial Bank

- The National Commercial Bank was established as a Libyan joint-stock company in 1970, in accordance with the provisions of Law No. 153 of 1970, issued on December 22, 1970. Over nearly half a century, the bank has contributed significantly to supporting the national economy through its extensive network of 75 branches spread across Libya, offering a wide range of banking services both domestically and internationally.
- The bank's fully paid-up capital is 700 million Libyan Dinars, divided into 70 million shares with a par value of ten Libyan Dinars per share. A breakdown of the capital structure is as follows:

Description	Participation Value	Participation Percentage
Central Bank of Libya	529,620,000	75.66%
Social Security Fund	53,550,000	7.65%
Economic Development Fund	35,700,000	5.10%
Public and Private Sector Shareholders and Individuals	81,130,000	11.59%
Total Participation	700,000,000	100%

2. Basis of Financial Statements Preparation

- The financial statements are prepared in accordance with the accounting principles generally accepted for banks in Libya, as well as in light of the applicable local laws, regulations, and guidelines.
- The preparation of the financial statements requires the making of certain accounting estimates, in addition to management making other accounting estimates regarding the selection and application of the bank's accounting policies. Note 3 to the financial statements details the items for which significant accounting estimates have been made.

3. Significant Accounting Policies Adopted

3/1 Foreign Currency Transactions

- The bank's accounts are maintained in Libyan Dinars. Other transactions during the financial year are recorded at the exchange rates prevailing on the date of the transaction. Non-monetary balances in foreign currencies are revalued at the year-end at the prevailing exchange rates, and any resulting exchange differences are recognized in the profit or loss account under the heading 'Foreign Exchange Gains and Losses'.
- When revaluing foreign currency balances at the year-end, the differences are recognized in the profit or loss account under the heading 'Revaluation of Foreign Currency Balances.'

3/2 Revenue Recognition

- Interest income on loans, deposits, and investments is recognized on an accrual basis, except for interest on non-performing balances. Recognition of interest income on non-performing balances is discontinued when the recovery of the principal or interest is deemed uncertain.
- In accordance with the decision of the Governor of the Central Bank of Libya No. 3 of 2010, interest income on non-performing balances is deducted from the gross loans and advances to arrive at the net direct credit portfolio until collection.
- Bank service charges are recognized when earned, except when these charges are for future costs of providing those services, in which case they are recognized when the costs are incurred.

3/3 Loans and Facilities Provision

Non-performing loans and advances are classified according to the Central Bank of Libya's circulars into: loans requiring attention, substandard loans, doubtful loans, and loss loans. Minimum specific provisions of 2%, 20%, 50%, and 100% of the net carrying amount of the non-performing loans are to be made against these classifications, respectively.

3/4 Cash and Cash Equivalant

- To prepare the cash flow statement, the cash and cash equivalents at the end of the financial year, including cash in hand and bank balances, are included.

3/5 Fixed Assets and Depreciation

- Fixed assets are recorded at historical cost and are shown in the balance sheet net of accumulated depreciation. The cost of an asset includes all costs incurred to bring the asset to its intended use.
- The annual depreciation expense is calculated using the straight-line method over the asset's useful life as follows:

	Statement	Depreciation Rate
1	Lands	0%
2	Branches' Buildings	3%
3	Rest Buildings	3%
4	Residential Buildings	3%
5	Vehicles	20%
6	Machinery and Equipment	10%
7	Computers	20%
8	Furniture, Fixtures, and Equipment	10%
9	Rest House Furniture and Equipment	10%
10	Fixed Asset Compositions	10%
11	Improvements in Owned Branches	20%
12	Improvements in Leased Bank Branches	20%

3/6 Intangible Assets

Costs incurred for pre-opening expenses and the costs incurred in the production, acquisition, and development of software, as well as costs incurred in acquiring and using specific software, are capitalized. The annual amortization expense is calculated using the straight-line method over a 5-year period.

3/7 Income Tax

Annual income tax includes current income tax, which is recognized in the income statement. Current tax is the tax expected to be paid on annual taxable profit, calculated at a rate of 20% of net taxable profit according to Law No. 7 of 2010.

3/8 Provisions

Provisions are established in the following cases:

- The bank has a legal or constructive obligation.

- There is a possibility of a future claim.
- A reliable estimate of the obligation can be made. Provisions are reviewed at the date of the financial statements and adjusted to reflect the best estimate of future payments, with adjustments recognized in the profit and loss account.

Provisions are released when the obligation that gave rise to them is extinguished or when it is no longer probable that the obligation will arise.

3/9 Employees Benefits

The bank is obligated to pay its share to the pension fund for the benefit of its employees, in accordance with the provisions of the Libyan Pension Fund Law. The bank bears the cost of this contribution, which is included in wages and salaries and recognized in the income statement on an accrual basis.

4. Risk Management

- The primary risks include credit risk, market risk, and liquidity risk. The bank's accounting policy is directed towards monitoring these risks.
- Loans and credit facilities, as well as current account balances and deposits with banks, and rights and obligations from third parties, are all financial assets exposed to credit risk, which is the risk that these parties will be unable to pay part or all of what is due to them on the due dates.
- Given the bank's dealings in multiple foreign currencies due to the nature of its business, it is exposed to the risk of price fluctuations.
